Burgess,

Thank you for contacting the Pair support team.

I found that your IP address had been blocked due to multiple failed login attempts. Please ensure that you are using the username and password that you would use to login to the Account Control Center. Also make sure that you are using SFTP on port 22. I have removed your IP address from the block list and you should be able to FTP now.

Please let us know if we can be of further assistance.

Best,

Brad C.

Hello,

Thank you for contacting pairNetworks Support.

SFTP connections generally use the following information:

Hostname: <Main Account username> ~~pairserver.com~~ *raystownrealty.com*
Username: <Main Account username>
Password: <Main Account password>
Port (optional): 22

For your account, the hostname will be raystown.pairserver.com, and the port number will be 22, as the Main Account credentials can only connect via SSH over FTP (SFTP).

FTP ADDRESS
22
FIREWALL!

Subject: Re: [G4C4E3D] new account and sever

Hello,

Thank you for contacting pair Networks. The domain raystownrealty.com still appears to be pointing toy our older hosting account (raystown). To make the domain point to the new account (raystownrealty), the DNS nameservers will need to be updated to match what is listed below.

dns3.pair.com
ns0.ns0.com

To access your account, you would use the Account Control Center, as you did for your older account, but with the new account username and password.

Username: raystownrealty
Password: (whatever your password is)
Server: raystownrealty.pairserver.com

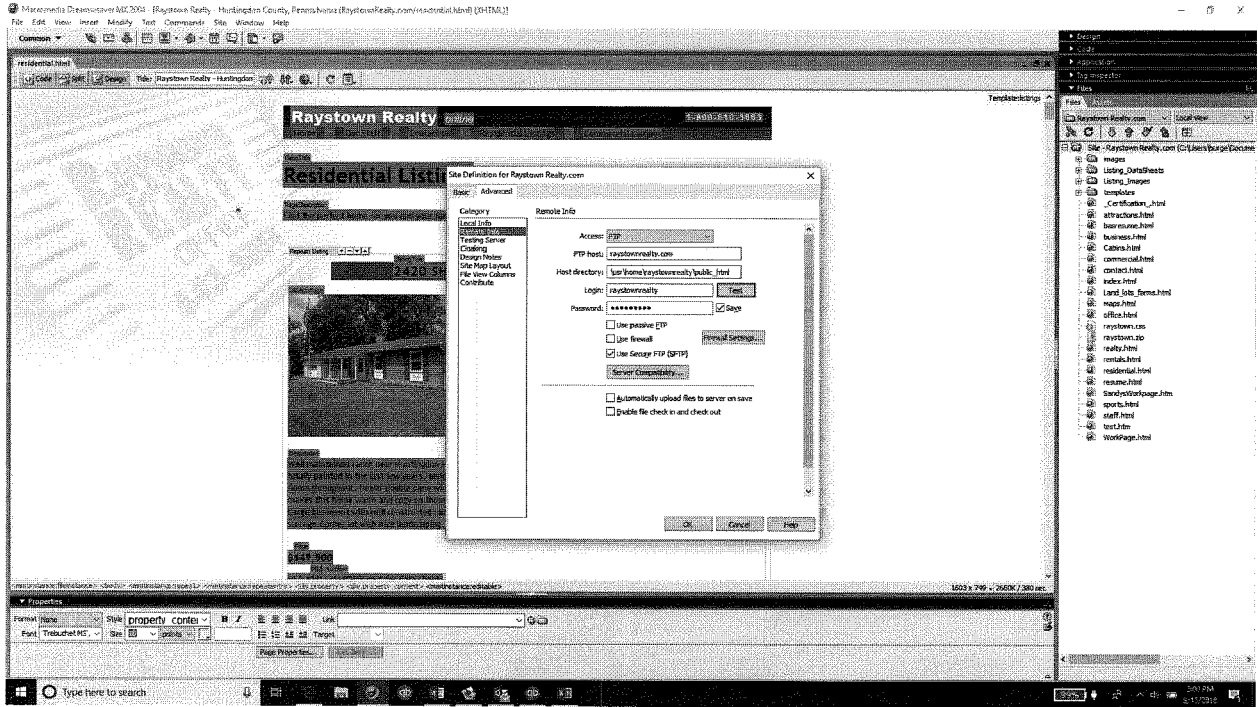

Thank you,
Bruce
